

Introduction

One of the key ways the City of Seattle can drive economic empowerment and create pathways for generational wealth is by making it easier for businesses—particularly minority- and women-owned businesses—to work with the City.

We can—and do—achieve this in a number of ways. We do it through our equity-centered policies, through intentional community outreach, and through close partnerships and input from the business community—particularly from women- and minority-owned business (WMBE) owners, a Citywide WMBE Advisory Board and close collaboration with departments across the City.

That's what the work looks like in practice. But what does it look like in impact?

Each year, the City of Seattle spends over \$1 billion on purchasing goods and services, retaining consulting services and contracting for public works projects. The **Department of Finance and Administrative Services** (FAS) manages the City of Seattle's WMBE Program, which works to make sure minority- and women-owned businesses have opportunities to pursue City contracts. Since FAS started the program, Citywide purchasing and consulting spending with WMBE firms has grown consistently year over year and doubled in the last 10 years. The City is headed in the right direction and is making great progress toward equity in procurement.

A key part of the WMBE program involves each City office and department setting annual goals for spending with WMBEs. This report offers details and a snapshot of utilization and City spending with WMBE firms in 2023. The City spent 28% of purchasing dollars (\$142 million) with WMBEs, exceeding the 22% goal. The City also exceeded its consultant goal (27%), spending 28% of consulting dollars (\$66 million) with WMBEs. And the City spent 13% of construction dollars (\$53 million) with WMBEs. In total, the City spent \$262 million (23%) with WMBEs. Citywide department performance is summarized in the WMBE report card visible in this report. Additionally, stories of just a few of the hundreds of WMBE partners the City works with every day can be found by accessing the QR code in this report with your smartphone.

Mayor Bruce Harrell has made it clear that contracting equity for Black- and minority-owned firms remains a top priority as part of his "One Seattle" initiative. In 2023, the Mayor signed Executive Order 2023-07 and directed departments to implement key actions that advance contracting equity and support women and BIPOC-owned firms that are disproportionally underutilized in public contracting opportunities.

FAS is supporting this Mayoral priority through policy and programmatic changes that open doors for Black- and other minority-owned firms and carefully tracking and reporting on progress.

In line with tracking and reporting on progress in contracting equity, the following pages offer several summaries of spending related to the WMBE program in 2023. This includes the progression of City WMBE spending in purchasing, consulting and construction since 2010. Provided is an overall breakdown of WMBE spend by race followed by further breakdowns of WMBE vendor demographics for purchasing, consulting and construction.

I look forward to working with all of you in 2024 to continue the City's work in expanding contracting equity.

Kiersten Grove

Purchasing WMBE Demographics

Purchasing is buying goods and "regular" services, like furniture, technology equipment or window washing services. In 2023, the City spent 28% of purchasing dollars (\$142 million) with WMBEs.

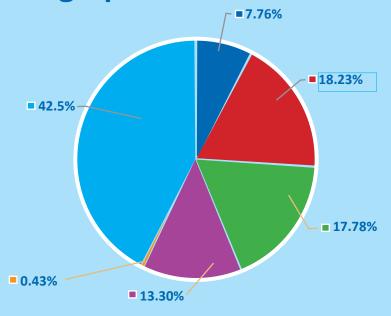

Consultant WMBE Demographics

Consulting is specialized professional services, like an accountant, a graphic designer or a community engagement specialist. Each department manages their own consultant contracts. FAS' role is to develop Citywide guidelines, policies and standard forms and templates. In 2023, consultant WMBE spending was 28% of consulting dollars (\$66 million).

Construction WMBE Demographics

■ Black	\$4,113,135
Asian American	\$9,666,008
Hispanic	\$9,428,377
■ Native American	\$7,053,588
■ White Female	\$22,545,765
Other WMBE	\$228,464
WMBE Total	\$53,035,519

Public works projects are a great opportunity for the City to contract with WMBEs or encourage their prime contractors to subcontract with WMBEs for part of the work. The City requires all prime contractors on contracts above \$300,000 to submit an "inclusion plan" that lays out good faith efforts for utilizing WMBEs. The sum of prime contracting plus subcontracting creates the total public works WMBE spend. In 2023, the City spent 13% of construction dollars (\$53 million) with WMBEs.
